

DIGITAL BRAIN INSTRUMENTS | ROBOTRIX

Robotrix is a Max4Live plugin developed to create high quality & realistic robotic voices for your films, games & multimedia projects. An easy-to-use effects processor to design different kind of robotic voices in a few minutes.

- **Modelling Voice:** Choose between 3 different voice type sources.
- **Tone:** Set the main modelling voice frequency.
- **Offset:** Set the Offset Midi frequency.
- **Offset Mix:** Set the amount of offset frequency.
- **LP/HP Filters:** Add LP/HP filters to the audio output.
- **Presets:** 18 preset slots available. Shift+Click to store a preset. Shift+Alt to remove a stored preset.
- **Dry/Wet Mix:** Set the amount of dry input mix.

IMPORTANT: Always keep Robotrix_pfft.maxpat and Robotrix.amxd files within the same folder.
