

WHAT'S NEW IN VPLAYER 4:

- Improved Audio Engine.
- Play up to 8 vst/au instruments.
- Serial & Parallel processing modes. Parallel mode allows playing 1 instrument plugin through 1 effect plugin on each slot (4 slots available), additionally the effect plugin can be converted into another instrument plugin, this way you can play up to 8 instruments at same time. Serial mode allows playing 1 instrument through 7 effect plugins.
- Audio input available. Use a microphone or audio from third-party software using virtual audio loopback drivers.
- Built-In Audio Player. Play files from your computer.
- Built-in MIDI Player. Play midi files from your computer.
- Built-In Metronome.
- Multitrack Recording. Record each plugin slot to individual audio files.
- Midi Recording. Record midi files while playing virtual instruments.
- Master Rack. Includes 2 vst/au plugins.
- Support for the latest Mac & Windows OS.
